CIA 1 – Component 1: Ethical Case Study Analysis on AI Systems

Course: Responsible AI

Assessment Type: Case Study Presentation & Ethical Analysis Report

Marks: 20 Marks (Converted to 10 Marks)

Objective

The purpose of this assessment is to critically analyze a real-world AI ethics case using established ethical theories and Responsible AI principles. Students should identify ethical challenges, evaluate stakeholder impacts, and propose responsible AI solutions.

Topics (Examples)

1. Facebook–Cambridge Analytica Data Scandal
2. Amazon AI Hiring Bias
3. Clearview AI Facial Recognition
4. TikTok Recommendation Algorithm
5. Predictive Policing Systems
6. Uber Self-Driving Car Accident
7. Deepfake Misuse and Misinformation
8. Generative AI and Copyright Issues

Deliverables

1. Presentation (8–10 Slides)

Prepare a professional presentation covering the following:

Slide 1: Title Slide

- Case Study Title
- Student Name & Register Number

Slide 2: Background of the Case

- Organization/System involved
- Purpose of the AI system
- Timeline of events

Slide 3: Problem Description

- What happened?
- Key ethical issue(s)
- Stakeholders affected

Slide 4: AI System Analysis

- AI technology used
- Data sources
- Decision-making process

Slide 5: Ethical Analysis – Utilitarian Ethics

- Did the AI maximize overall benefit?
- Who benefited and who was harmed?

Slide 6: Ethical Analysis – Deontological Ethics/ Normative

- Were ethical rules, duties, or obligations violated?
- Was the system fair and transparent?

Slide 7: Ethical Analysis – Virtue Ethics

- Did the developers/organization demonstrate honesty, fairness, and responsibility?

Slide 8: Ethical Analysis – Rights-Based Ethics

- Were privacy, consent, autonomy, or other rights violated?

Slide 9: Ethical Analysis – Care Ethics

- Were vulnerable groups adequately protected?
- Were human well-being and relationships considered?

Slide 10: Recommendations & Conclusion

- Responsible AI improvements (Based on the Responsibility Gaps)
- Governance and policy recommendations
- Key lessons learned

2. Ethical Analysis Report (2–3 Pages)

Report Structure

1. Introduction

- Overview of the selected case
- Importance of the issue

2. Ethical Challenges

- Identify major ethical concerns
- Explain stakeholder impacts

3. Analysis Using Ethical Theories

Apply all five ethical theories:

- Utilitarian Ethics
- Deontological Ethics
- Virtue Ethics
- Rights-Based Ethics
- Care Ethics

4. Responsible AI Evaluation

Analyze the case based on:

- Fairness
- Accountability
- Transparency
- Privacy
- Safety
- Human Oversight

5. Recommendations (Based on Responsibility Gaps)

Suggest measures to prevent similar ethical issues.

6. Conclusion

Summarize key findings and lessons learned.

Evaluation Rubric (20 Marks)

Criteria	Marks
Understanding of Case Study	4
Application of Ethical Theories	6
Responsible AI Analysis	4
Quality of Recommendations	3
Presentation & Communication	3
Total	20
